PERMANENTE MEDICINE
Mid-Atlantic Permanente Medical Group

Mid-Atlantic Permanente Research Institute

2027 – 2028 Physician Research Scholars

Andrew Schissler, MD, FCCP

Mentor: Nancy S. Weinfield, PhD

Dr. Schissler is a Pulmonologist located at the Largo Medical Center.

He graduated from Harvard Medical School in Boston, MA, and while there, completed the Harvard Medical School Summer Research Fellowship program. His residency program was located at Columbia University Medical Center and followed as a Fellow within the Department of Pulmonary and Critical Care Medicine at Harvard/Brigham and Women's Hospital in Boston, MA.

Dr. Schissler hopes to learn drivers and patterns of utilization within patients diagnosed with persistent eosinophilia and examine a potential dose-response relationship. He theorizes that this identification can lead to targeted interventions within this high-risk population.

Kim Ohaegbulam, MD, PhD

Mentors: Michael J. Miller, RPh, DrPH, FAPhA and Lilian Perez, PhD, MPH

Dr. Ohaegbulam is a Radiation Oncologist in South Baltimore County.

He graduated from the Albert Eistein College of Medicine in the Bronx, NY – receiving both a MD and PhD in Cancer Immunology. He then completed residency at Oregon Health and Science University, serving as Radiation Oncology Chief Resident. He also served as a Radiation Oncology Research Fellow with AstraZeneca in Gaithersburg, MD as part of his research training.

Dr. Ohaegbulam plans to examine radiation oncology treatment outcomes in a racially diverse patient population and uncover potential disparities in the Black patient population with prostate cancer. It is hoped that this identification can then form the foundation for equitable-based care across patient populations.
